

Module 7, Touchpoint 1

Handout 1 for group exercise: Facility Y case study

This case study is for a hypothetical sub health center called Facility Y in Bhavnagar district. Figure 1 shows the CHO dashboard from the NCD app. Figure 2 shows the ASHA dashboard from the NCD app. In this group exercise, each group will use these dashboards to fill out the response table.

Figure 1: NCD app – CHO dashboard

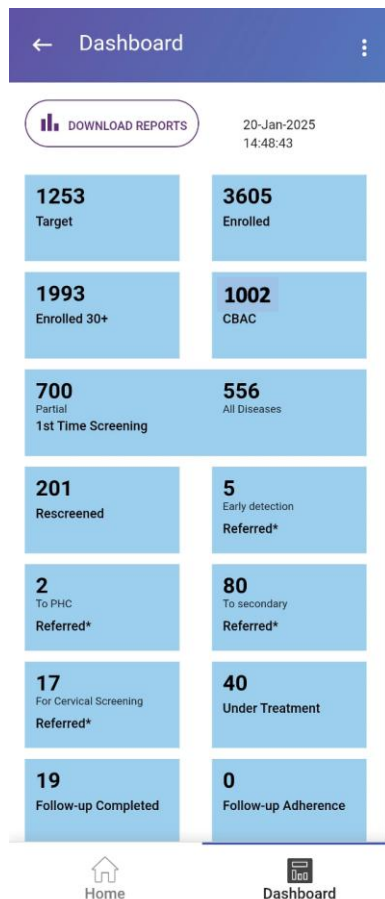

Figure 2: NCD app – ASHA dashboard

Response table (to be completed):

Sr. No.	Indicator	Numerator (A)	Data source for numerator (ASHA dashboard/CHO dashboard)	Denominator (B)	Data source for denominator (ASHA dashboard/CHO dashboard)	Indicator estimate (A/B)*100
1	Proportion of total enrolled who are equal to or more than 30 years of age in Facility Y	Total enrolled population who are equal to or more than 30 years of age in Facility Y		Total enrolled population in Facility Y		
2	Proportion of individuals whose CBAC form was filled in Facility Y	Total adults of age 30y and above for whom CBAC is completed in Facility Y		Total enrolled population of age 30y and above in Facility Y		
3	Proportion of individuals with CBAC score greater than 4 in the village	Total individuals for whom CBAC score is greater than 4 in the village		Total enrolled population in the village		
4	Proportion of individuals 30 years and above whose 1 st time partial screening is completed in Facility Y	Total adults of age 30y and above for whom 1 st time partial screening is completed in Facility Y		Total enrolled population of age 30y and above in Facility Y		
5	Proportion of individuals 30 years and above whose 1 st time all disease screening is completed in Facility Y	Total adults of age 30y and above for whom 1 st time all disease screening is completed in Facility Y		Total enrolled population of age 30y and above in Facility Y
